- ✓ **1 Bag Worm Compost**
- ✓ **20 Cup-Size Seedlings**
- ✓ **1 5 lb. Bag 4-4-4 Fertilizer**
Down to Earth Organic Vegetable Garden

SUGGESTED PLANT LIST:

INSTRUCTIONS

01

SETUP

Careful and regular hedging, pruning and trimming of your garden is essential to it's maintenance and includes roses, plants, shrubs, fruit trees and small trees.

02

PLANT

Leave some space for the soil on the top planter; when you plant your seedlings, start from the bottom up and put the extra soil that you take out on the top as you plant.

03

FERTILIZE

Add one teaspoon of fertilizer and one tablespoon of worm compost to each hole before you plant. You can also mix some worm castings in a ratio of 1-4 with the potting mix.

04

CARE

Make sure to put your herbs in an area with adequate sunlight. If they are inside during the winter, pick a window that faces South. East/West will be a second option; rotate the tower every other day so the plants in the back also get sunlight.
ENJOY!
